To: Physiological Science Graduating Seniors
RE: Outstanding Senior Award
Undergraduate Poster Session

Each year the Undergraduate Affairs Committee chooses one student as the Physiological Science Outstanding Senior of the Year. The student will be recognized at the Undergraduate Poster Session in May 2003, and the graduation celebration, in addition to receiving a monetary stipend.

Due to your outstanding academic achievements, you have been sent the enclosed nomination form for this award. You need not be a departmental honors student to be considered for the award. However, you need a letter of recommendation from the **faculty** sponsor of your Phy Sci 190/199. I encourage you to complete and return the nomination form along with the letter of recommendation to me by **Friday, February 21, 2003**.

Having participated in research, you are also invited to present your findings and your project to a combination of staff, faculty and family members at the Undergraduate Poster Session in May 2003 (*participation in this event is **required** by Dept. Honors students*). This is a wonderful opportunity to receive recognition for your work, as well as compete for outstanding poster, which also includes a monetary stipend. Please submit an abstract and/or a copy of your final research paper to be considered for this opportunity by **Friday, May 10, 2003**.

Please contact me if you have any further questions or concerns about either of these opportunities at (310) 825-3892 or by email at marci@physci.ucla.edu. Thank you and congratulations.

Sincerely,

Marci Matsushita
Undergraduate Counselor

2003 Nomination Sheet
For the Outstanding Senior Award for
Physiological Science Students

**Participation in Departmental Honors IS NOT required

Nominee's Name _____ Phone# _____

Local Address _____ Email _____

Permanent Address (if different) _____

When will you graduate? (circle one) F02 W03 S03 Summer 03 Other _____

What are your educational and/or vocational goals after graduation? _____

-
1. Identify (circle) the Physiological Science course you have contracted for Honors Content (only necessary if you are participating in Dept. Honors).

111A 111B 111C

2. Include 1 unofficial transcript. Major GPA (check DPR) _____

3. Identify your faculty research sponsor _____ and the
title of your honors thesis/research paper: _____

-
